

Contact Cleaner

KONTAKT CHEMIE Contact Cleaner 390

Description:

Contact Cleaner 390 is specially designed for the cleaning and protection of electrical and electro-mechanical parts.

General properties and applications:

The solvents penetrate in the most difficult to reach areas. The special components will remove persistent corrosion and deposits (oxides, sulphides,..) from all kinds of metal contacts, improving the electrical conductivity. The protective film will reduce the friction and wear and will protect the contacts from severe corrosive atmospheric influences. Contact Cleaner 390 is used for maintenance and repair jobs on TV, radio, electronic equipment household appliances, (car) electronics,.....

Contact Cleaner 390 is safe to use on metals, graphite, carbon-elements. Safe on most plastics and insulators.

Technical data (after evaporation of solvents)

Density (@ 20 °C)	ASTM D891	0,75 g/cm ³
Flash point	ASTM D56	< 0 °C
color		amber

Application instructions:

Never use on energised equipment. Shake can well before usage. Spray onto the contact surfaces and allow acting. After drying, if necessary, remove dirt with a cloth or blow it away with Dust Off. Then spray a final film. Move the contacts. Allow to dry.

When applying the product, ensure there is good ventilation. KONTAKT CHEMIE Contact Cleaner 390 contains highly flammable isopropanol. Further safety instructions are to be found in the safety datasheet.

Available:

Aerosol, 200 ml

All statements in this publication are based on service experience and/or laboratory testing. Because of the wide variety of equipment and conditions and the unpredictable human factors involved, we recommend that our products be tested on-the-job prior to use. All information is given in good faith but without warranty neither expressed nor implied.
